

# Nazarov Dmitry

## IT-Student

I'm a student at TAMK focusing on backend and full stack development. Strong interest in backend, cybersecurity and databases. Actively building personal projects and improving production-level skills. I won't say more, because **actions speak louder than words**.

### Technical:

#### Backend

Java, [Node.js](#), Python, C# .NET

#### Frontend

JavaScript, React, HTML, CSS, Tailwind CSS, Material UI

#### Databases

PostgreSQL, SQLite

#### Tools

Git / GitHub. VS Code, Figma

### Languages:

**English:** fluent

**Finnish:** native

**Russian:** native

### Hobbies

-Gym

-Music production (*Ableton Live*)

-Reading (*psychology and history*)

-Gaming

### Courses:

- reserve officer course

## Projects

### Weather App — React + API

Minimalistic weather forecast application built with React and Vite.

- Integrated external weather API
- Implemented dynamic UI and responsive layout
- Focus on clean UX and performance

Tech: React, JavaScript, REST API

### LIFT — Mobile Game (Android)

Top-down driving game developed as a team project using Godot and C#.

- Implemented core gameplay mechanics and player controls
- Worked on game logic, movement system and level interactions
- Collaborated in an Agile team environment with sprint planning and reviews

Tech: C#, .NET, Godot, Android

### TUNNEL — CLI Text Adventure (Python)

Atmospheric data-driven text adventure game.

- Modular architecture
- JSON-based game data
- Focus on clean code structure

Tech: Python

## Courses right now:

- DevOps
- Object Oriented Programming
- Full Stack Programming
- Data Analytics
- UI / UX

## Education

### Tampere University of Applied Sciences (TAMK)

Bachelor of Business Administration — Information Technology  
(Tradenomi, Tietojenkäsittely)  
2024 — Present

Focus: software development, backend, full stack, cybersecurity
